

Cellular smoke alarm and air quality monitor

Enhance your product portfolio while generating recurring revenue with a versatile two-in-one smart smoke alarm and air quality monitor. Provide your customers with advanced safety features that bring peace of mind and offer convenient smart home capabilities for their comfort.

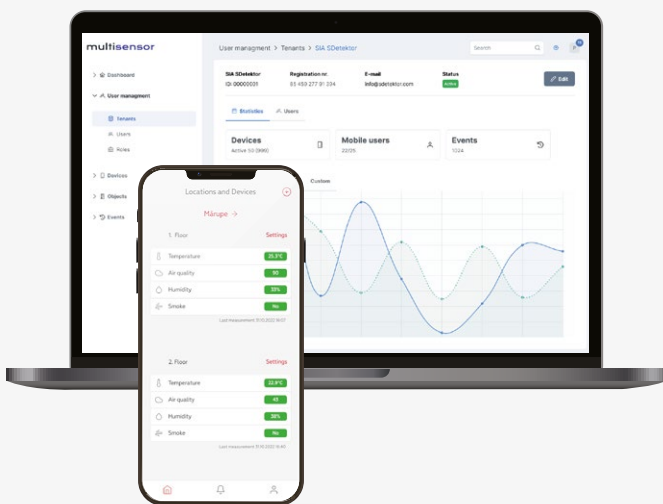

**Produced
in the EU**

How it's built

-  Always on & no wires, Wi-Fi, or Bluetooth connection needed
-  Dual wavelength optical smoke detector
-  Air quality monitoring
-  Comfort temperature and humidity level observation
-  Eradicated false alarms
-  Patented sensor and algorithm
-  Integrated cellular and data connectivity
-  Certification: EN 14604:2005/AC:2008

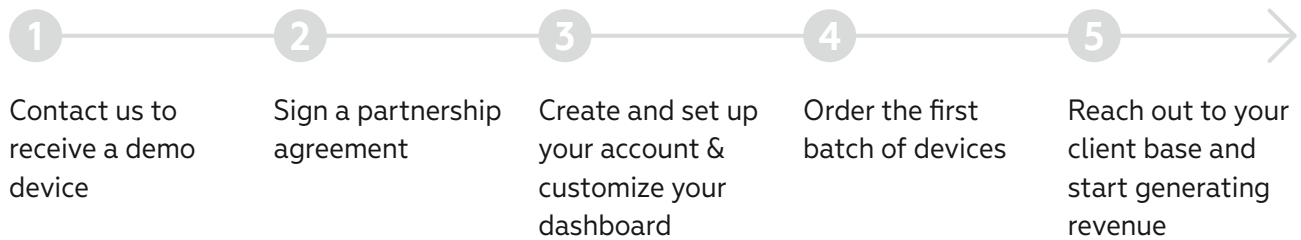

How it works

- Device management via a dedicated dashboard and app
- iOS and Android apps with a white-label option
- Fast, secure, and reliable cloud infrastructure (AWS)
- Multi-tenant functionality
- Versatile API with detailed documentation
- Multi-level notification system – push notifications, texts, and calls
- Option to redirect notifications to e.g. fire department or call center
- Continuous air quality observation & access to historical data
- Fully GDPR compliant, data stored in the EU
- Enterprise level support

It has never been so easy to get started

We take care of everything – device, connectivity, app, customization, and marketing support – while you focus on your clients.

Partnership benefits:

- Strong and long-term relationships with your clients
- A competitive edge with an out-of-the-box IoT device and solution
- Recurring income through subscription-based services
- Broadened business portfolio and entrance into new business sectors
- Close to zero time, resources, or money investment needed
- Customizable solution that can be integrated into your existing systems via API
- Pay-per-use model – no hidden fees
- Low minimum order quantities
